1 PRESENTATION BY GROUP PRESIDENT & CEO

At the start of the AGM, Mr Vincent Chong, Group President & CEO, delivered a presentation on the Company’s aspiration and corporate purpose. He provided key highlights of the Group’s 2022 financial performance. These were:

- (a) strong underlying performance against a challenging environment as reflected in EBIT and net profit for the last 3 financial years on a comparable basis without taking into account COVID-19 related government support;

- (b) revenue growth from all 3 segments totaling 17%, from \$7.7b in financial year 2021 (FY2021) to \$9b in financial year 2022 (FY2022);
- (c) strong order book of \$23b as at 31 Dec 2022, which provides revenue visibility, and
- (d) productivity metrics for each of opex and staff costs (excluding government support) as a ratio of revenue trended well in the last 3 financial years.

On the key focus areas in 2022, Mr Vincent Chong reported that the Company had strengthened its global presence, continued to streamline its portfolio, integrated sustainability as our core and continued to drive technology & innovation. He went on to elaborate on the progress and achievements made in each of the focus areas. These included the acquisition of TransCore, continued capacity expansion in Passenger-to-Freighter conversions and new MRO solutions with LEAP-1B engine quick-turn service at Commercial Aerospace and the global contract wins by Urban Solutions & Satellite Communications (“Satcom”) and Defence & Public Security. For Satcom, while the long-term industry outlook remains positive, near-term headwinds continue with short-term weakness in performance. The Satcom business is developing its internal transformation plan to position for future opportunities, while continuing to invest in R&D for product development.

He also updated on the Company’s sustainability ambitions, its approach in driving technology and innovation and Community Outreach initiatives. He further highlighted the Group’s strong balance sheet and balanced debt profile. In terms of the macro outlook for 2023, he noted the various opportunities for the Company arising from countries’ re-opening post-COVID, though near-term headwinds in the form of geopolitical tensions, inflation pressures, supply chain disruption and Satcom industry disruption, persist. He then shared the key milestones achieved in 1Q23.

He concluded his presentation with a recap on the Company’s ambitions as set out in its 5-year Plan with 2020 as the base year and informed that the Company is on track towards meeting its 2026 targets.

Please refer to the Company’s website and the announcement released via SGXNET on 20 April 2023 for a copy of Group President & CEO’s presentation slides.

ORDINARY BUSINESS

11.1 RESOLUTION 1
DIRECTORS' STATEMENT, AUDITED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2022 AND THE AUDITORS' REPORT

The Chairman proposed the resolution and invited questions from the shareholders.

A shareholder asked about the areas of growth for the TransCore business. Chairman explained that TransCore is in the business of providing end-to-end tolling solutions which enable reliable and automated electronic toll collection, including back-office operations to process toll collection from registered account owners. These replace the existing infrastructure of manned toll booths used by the government agencies for manual collection of toll. TransCore's growth potential in the U.S. is both in its core solutions as well as in congestion pricing solutions for urban cities to manage traffic congestion during peak hours.

Mr Vincent Chong added that the Company is pursuing opportunities to bring TransCore's tolling solutions to Southeast Asia.

The same shareholder asked questions regarding the following areas:

- (i) the growth trajectory of the Commercial Aerospace business;
- (ii) capex on the Passenger-To-Freighter (P2F) conversions;
- (iii) the performance of the Composite Manufacturing and Nacelle businesses from the acquisition of MRA Systems; and
- (iv) the use of Treasury Lock ("T-Locks") mechanism in refinancing part of the outstanding short-term U.S. commercial papers

Mr Vincent Chong gave his response as follows:-

- (i) Long-term growth prospects of the Commercial Aerospace business continue to be positive and the Company is well positioned to capture growth. The demand for P2F conversion was accelerated during the Covid-19 pandemic when the strong surge in international and interstate e-commerce businesses heightened demand for freight coupled with severe reduction in freight capacity due to the near absence of passenger flights. Commercial Aerospace was able to capitalize on this opportunity to accelerate investment in P2F conversions. Conversion slots for A320/321P2F and A220P2F programmes have been fully booked through 2026.
- (ii) Commercial Aerospace also focuses on the aircraft leasing business in Europe. We lease mid to end-of-life aircraft with the intent of recycling capital. Our target was to pare down our equity stake in these investments and we would operate like an Aircraft REIT and earn management fees in managing the customers' aircraft fleet. This business model enables Commercial Aerospace to have immediate access to feedstock and perform its capability in the P2F conversion business, as well as access opportunities to carry out MRO work.
- (iii) As the exclusive supplier for the composite floor panels for all Airbus aircrafts and for engine nacelles for A320neo, the respective composite manufacturing and nacelle businesses were performing well. The nacelle business was already earnings accretive in the first year post the acquisition. Despite the economic downturn caused by the Covid-19 pandemic, both businesses reported positive results in FY2022. The business outlook for these businesses remain positive going forward.

Mr Foo Chee Keng Cedric, Group Chief Financial Officer gave his response as follows:

- (iv) The T-Locks mechanism was utilized as there was a timing gap between the signing of the definitive agreement to acquire TransCore in October

2021 and the obtaining of the approval from the US Government required for the completion of the acquisition, which approval was obtained sometime in March 2022. T-Lock helped the Company to hedge against potential volatile interest rates during the 6-months period. With the USD 1 billion of 10 year T-Lock in total, the Company reported a settlement of approximately USD 92 million in the Company's favour, thereby mitigating our cost of borrowings.

In response to another shareholder's question on whether the Company would be increasing its debt gearing ratio in tandem with its 2026 target revenue of \$11b just as it had increased debt to fund its acquisition of TransCore, Mr Vincent Chong clarified that the growth in revenue to achieve its target revenue of \$11b is expected from organic growth in the Company's existing businesses.

Several shareholders thanked Mr Vincent Chong for his comprehensive presentation and expressed their appreciation to the Chairman, Board and Management for the Company's good financial performance, growth and dividend.

There being no further questions from the shareholders, the Chairman put Ordinary Resolution 1 to the vote.

Upon release of the voting result (refer to attached **Annex 2**), the Chairman declared the following Resolution carried:-

RESOLVED THAT the Directors' Statement, Audited Financial Statements for the year ended 31 December 2022 and the Auditors' Report be received and adopted.

11.2 RESOLUTION 2

DECLARATION OF A FINAL ORDINARY TAX EXEMPT (ONE-TIER) DIVIDEND OF 4.0 CENTS PER SHARE FOR THE YEAR ENDED 31 DECEMBER 2022

The Chairman informed that the final dividend of 4.0 cents per share, if approved by shareholders, would be paid on 9 May 2023. This would bring the total dividend declared for the financial year ended 31 December 2022 to 16.0 cents. This was an increase of 1.0 cent (or approximately 6.0%) over and above the dividends declared for the previous year.

The Chairman proposed the resolution and invited questions from the shareholders. There being no question, the Chairman put Ordinary Resolution 2 to the vote.

Upon release of the voting result (refer to attached Annex 2), the Chairman declared the following Resolution carried:-

11.6 RESOLUTION 6

APPROVAL FOR THE SUM OF S\$2,406,662 (2021: S\$2,025,158) AS DIRECTORS' REMUNERATION FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2022

The Chairman proposed the resolution pertaining to the approval of a sum of \$2,406,662 as Directors' remuneration for the financial year ended 31 December 2022.

He informed that the non-executive Directors' fee structure for FY2022 remained unchanged from FY2021. The total compensation was higher by approximately 18.8% as compared to 2021 due to the introduction of a Deputy Chairman retainer fee, higher Directors fees compared with FY2021 following the 10% voluntary reduction in NEDs' fees which was applied for the first half of FY2021 due to the COVID-19 pandemic, new Directors appointed in FY2021 serving for a full year in FY2022 as well as more Board Committee meetings in FY2022 as compared with FY2021.

All non-executive Directors including the Chairman who were shareholders of the Company had abstained from voting in respect of this Resolution.

11.7 RESOLUTION 7

APPROVAL FOR THE SUM OF UP TO S\$2,500,000 AS DIRECTORS' REMUNERATION FOR THE FINANCIAL YEAR ENDING 31 DECEMBER 2023.

The Chairman explained that the prospective approach for payment of FY2023 Directors fees was a more equitable way of paying directors' fees as otherwise directors would have to complete a whole financial year before they were being paid after the shareholders' approval had been obtained in the subsequent AGM.

The Chairman shared that the amount of the Directors' remuneration for FY2023 was computed based on the anticipated number of Board and Board Committee

meetings for FY2023, assuming full attendance by the Directors at such meetings, and in accordance with the Directors' fee structure set out in the section on "Corporate Governance" at page 94 of the Annual Report 2022.

The exact amount of Directors' fees received by each non-executive Director for FY2023 would be disclosed in the Company's Annual Report 2023. If, for any unforeseen reasons, payments are required to be made to the Directors in excess of the amount proposed, the Company would seek approval from shareholders at the subsequent Annual General Meeting in year 2024.

All non-executive Directors including the Chairman who were shareholders of the Company had abstained from voting in respect of this Resolution.

The Chairman proposed the resolution and invited questions from the shareholders.

In response to a shareholder's question, the Chairman said that each Non-Executive Director's remuneration and attendance at Board and Board Committee meetings for FY2023 would be disclosed in next year's Annual Report, consistent with current arrangements.

There being no further questions from the shareholders, the Chairman put Ordinary Resolution 7 to the vote.

Upon release of the voting result (refer to attached **Annex 2**), the Chairman declared the following Resolution carried:-

By Order of the Board

Tan Wan Hoon
Joint Company Secretary
Singapore, 14 April 2023

1. With the challenging geopolitical and economic environment such as the conflict in Ukraine, the rising tension between U.S. and China, the development of a multi-polar world, the U.S. dollar losing its hegemonic status, fallout from collapse of banks, rising social unrests in Europe and U.S. How does the Board:

a) Assess the evolving risks and uncertainties?

b) Protect shareholder value whilst navigating for desired outcomes?

- The Group has established a Risk and Sustainability Committee (RSC) since 1998 to oversee risk management at both the strategic and operational levels.
- Enterprise risk management (ERM) is an integral part of how we go about managing our business. Under the ERM framework, key risks are regularly reviewed and risk registers refreshed to incorporate new and emerging risks.
- The Russia/Ukraine conflict, geopolitical tensions between U.S. and China, as well as various security, social and economic challenges have been identified as risks that we are confronted with.
- Heightened security focus and defence self-sufficiency augur well for defence businesses in general. Possible economic slowdown requires us to continually improve productivity and save costs to ride through periods of slow economic activities and emerge stronger when the economy recovers. Hence, we have always been focusing on the mid and long-term by investing even in the troughs of economic cycles. We also pay close attention to supply chain resilience and ESG issues.
- For further information about our risk management approach and key practices, please refer to pages 68-71 of our [Sustainability Report 2022](#) and pages 96-101 of our [Annual Report 2022](#).

2. Does ST Engineering have insurance policies in place to manage the said risks?

- The Group has a comprehensive insurance programme to protect our worldwide business operations against financial losses arising from property damage, business interruptions, cargo damage in transit, third-party liability etc. Nevertheless, not all risks can be insured at reasonable premiums.

3. What was the rationale for the divestment of the U.S. Marine business? Where/how were the losses reported? What other divestment targets do you have?

- ST Engineering takes a disciplined approach to portfolio management. The Group regularly undertakes portfolio reviews to unlock capital and allow us to accord more focus on businesses that drive value creation.
- In the six years since 2016 when we began to rationalise our investment portfolio, we have divested or terminated 16 businesses. As the markets and the operating environment for each line of business evolve, we will continue to prioritise businesses that allow us to play to our strengths, are attractive, and are scalable. This way, our portfolio yields will remain resilient and continue to generate value for shareholders, customers, and employees alike.
- The decision to exit the U.S. Marine business was made after significant turnaround efforts, including management team changes in the last few years. Despite those efforts, the business remained unprofitable. Following a thorough review of the situation, we decided that divesting the business was the best option for us rather than to continue.
- We had disclosed/described the challenges facing our U.S. Marine businesses where meaningful, when presenting our quarterly/annual results at the Group and segment and/or sector level.
- The losses of the U.S. Marine business were fully incorporated in the segment EBIT of the Defence & Public Security cluster, and before the Group's reorganisation in 2021, under the Marine sector. Financial performances at the individual programmes/projects/business units level are not disclosed for competitive or other business reasons.
- The Group will continue to keep stakeholders informed as and when there are relevant material business developments.

4. Has the Marine business' leadership compensation considered the U.S. Marine results?

- Yes, it has been taken into consideration over the years.

5. What was the rationale for the Gul yard acquisition for the Marine business?

- Per our announcement in early February this year, the Group's Singapore Marine business recent [acquisition of the Gul yard](#) (site and assets) in Singapore was for its commercial ship repair business. This asset purchase obviates the need to build a greenfield shipyard, which would require much higher construction and material costs as well as lead time. The Gul yard replaces ST Engineering's Tuas shipyard, as its lease will expire at the end of 2024.
- Taking over the brownfield site versus a greenfield site is an effective way to reduce capex in a high-cost environment. More importantly, building on the existing infrastructure and facilities enables us to start operating immediately and effectively with minimal disruption.
- The Group's ship repair business in Singapore has performed well and has been profitable over the years and we expect it to continue to grow.

6. Can you provide an update on the integration of TransCore, and how will shareholders be updated on its performance?

- TransCore's transition into the Group covering business operations, policies and processes is nearing completion.
- Meanwhile, TransCore continues to win notable contracts in the U.S. We continue to drive synergies and focus on cross-selling opportunities to bring TransCore's toll solutions into Southeast Asia and tap on its extensive and established market channels in the U.S. to export our Smart Mobility solutions. TransCore will also leverage the Group's R&D and product development capabilities.
- The TransCore acquisition, while achieving the target of being cash flow positive to the Group in 2022, was not yet earnings accretive in the first year. Per our investment case, we expect this investment to be earnings accretive from the second year post-acquisition.
- The Group will continue to provide relevant updates/announcements when there are material developments on TransCore through platforms such as our financial results briefings, market updates briefings, and/or SGXNet announcements.
